Professional Experience

Intelmatix Data Science Intern

London, United Kingdom | May 2026 - Present

- Integrated 12 geospatial datasets (census, traffic, POI, parcels, road networks, etc.) into a single area-level dataset.
- Engineered area-level features, including ratios, aggregations, and transformations, to support urban pattern discovery.
- Applied K-means and HDBSCAN, with LLM-assisted profiling, to identify multi-dimensional urban area archetypes that inform location intelligence and business decisions.
- Used XGBoost and SHAP to validate cluster separability and identify the key features distinguishing each segment.

Unilever Customer Development Data & Analytics Intern

Amsterdam, Netherlands | Sep 2024 - Feb 2025

- Conducted research and developed innovative recommendations to improve data foundation and the elasticity model within the Global Customer Strategy and Planning team, improving predictions and increasing performance metrics (R^2 and MAPE).
- Enhanced accuracy by 4.5% in capturing demand fluctuations by shifting from linear to non linear incremental elasticity models, through incorporation of psychological price points.
- Analysed several methods to identify product interactions, applying data-driven insights to enhance cross-elasticity accuracy.
- Applied Gradient Boosting Regressor and Mutual Information Scores to identify key forecasting features, assessing the importance of both existing and engineered variables e.g. paydays, GDP, brand power using the GB Hellman's Mayo dataset.
- Collaborated closely with a multicultural Data and Analytics team to report my findings and implement actionable insights, showing resilience under tight project deadlines.
- Presented key findings and final strategic recommendations to senior management and the broader team.

Education

University College London (UCL), MSc Business Analytics

London, UK | Sep 2025 - Present

- *Modules:* Machine Learning for Business, Data Engineering, Predictive Analytics, Operations Analytics, Marketing Analytics, Statistical Foundations of Business Analytics, Business Strategy and Analytics, Programming for Business Analytics

University of Amsterdam (UvA), BSc Business Analytics, GPA 7.8/10.0

Amsterdam, Netherlands | Sep 2022 - Jun 2025

- *Modules:* Probability Theory and Statistics, Advanced Linear Algebra, Calculus, Econometrics, Finance, Machine Learning, Text Retrieval and Mining, Computer Systems and Engineering, Data Science, Operations Research, etc.

The Grammar School Limassol

Limassol, Cyprus | Sep 2020 - Jun 2022

- *School Leaving Certificate* 92%, *A-Levels:* Mathematics, Physics, Biology, Greek

Academic Projects

Multi-Agent Film Intelligence System

London, United Kingdom | April 2026

- Built a multi-agent AI data pipeline ingesting movie metadata, audience reviews, and plot summaries from 3 sources (TMDB API, Letterboxd scraping, Wikipedia) into 4 specialised databases (PostgreSQL, MongoDB, ChromaDB, Neo4j) with retrieval-augmented generation, sentiment augmentation, and data lineage tracking via Marquez.
- Developed a LangGraph ReAct two-agent system with locally deployed Ollama LLM, hallucination checking, and 6 custom database tools exposed via FastAPI with SSE streaming, a Model Context Protocol server and Docker containerisation.

Bachelor's Thesis: Career Path Analysis of UvA Graduates (Grade: 9.0/10.0)

Amsterdam, Netherlands | June 2025

- Built an end-to-end scalable Python data pipeline (Google Custom Search API, automated LinkedIn scraping, preprocessing) to collect and structure career data for UvA alumni.
- Engineered career progression features and developed logistic regression models using scikit-learn for model experimentation and validation (stratified cross-validation, class imbalance handling) and statsmodels for statistical inference, analysing predictors of executive career attainment (Director, Partner, CFO), evaluated using F1, ROC-AUC and McFadden's pseudo R^2 .

Skills

Languages: English (Native), Greek (Native)

Programming languages: Python (Advanced); R, SQL, LaTeX (Intermediate); Stata, Linux (Beginner)

Interests & Extra Curriculars:

- **Ballet:** 15 years training; Completed graded RAD Examinations grades 6-8, Advanced Foundation Ballet.
- **Theotokos foundation, Youth Development Centre:** Coordinated the creation and sale of handmade pottery, raising funds for the foundation while collaborating closely with children, volunteers and community members.
- **Student Ambassador UCL School of Management:** Supporting prospective students through peer to peer guidance.
